INDICATOR 19

Status Dropout Rates by Race/Ethnicity

The indicator and corresponding tables are taken directly from *The Condition of Education 2005*. Therefore, the page numbers may not be sequential.

Additional information about the survey data and supplementary notes can be found in the full report. For a copy of *The Condition of Education 200*5, visit the NCES website (http://nces.ed.gov/pubsearch/pubsinfo.sap?pubid=2005094) or contact ED PUBs at 1-877-4ED-PUBS.

Elementary/Secondary Persistence and Progress

Status Dropout Rates by Race/Ethnicity

Since 1972, status dropout rates for Whites, Blacks, and Hispanics ages 16–24 have declined; nonetheless, rates for Hispanics have remained higher than those for other racial/ethnic groups.

Dropouts from high school are more likely to be unemployed and earn less when they are employed than those who complete high school (U.S. Department of Commerce 2004, tables 215 and 608). Among adults age 25 or older, those who did not complete high school report worse health than their peers who did complete high school, regardless of income (NCES 2004-077, indicator 12).

The status dropout rate represents the percentage of an age group that is not enrolled in school and has not earned a high school credential (i.e., diploma or equivalent, such as a GED). According to this measure, 10 percent of 16- through 24-year-olds were out of school without a high school credential in 2002 (see supplemental table 19-1). Although the status dropout rate declined for this age group between 1972 and 2002, it remained fairly stable over the last decade (1992 through 2002).

Status dropout rates and changes in these rates over time differ by race/ethnicity. Each year between 1972 and 2002, the status dropout rate was lowest for Whites and highest for Hispanics. The status dropout rates for Whites, Blacks, and Hispanics declined between 1972 and 2002. The gap between Blacks and Whites narrowed during the 1970s and into the mid-1980s, but there was no measurable change in the period between 1985 and 2002. From 1972 through 2002, there has been no measurable change in the gap between the status dropout rates for Hispanics and Whites.

In 2002, almost one-third of status dropouts (30 percent) ages 16-24 were Hispanics who were born outside of the United States1 (see supplemental table 19-2). Higher dropout rates among Hispanic immigrants partly account for the persistently high dropout rates for all Hispanics. Among Hispanic 16-through 24-year-olds who were born outside the United States, the status dropout rate of 41 percent in 2002 was more than double the rates for first- or later-generation Hispanics in this age group born in the United States (14 and 11 percent, respectively). Nevertheless, Hispanics born in the United States were more likely to be high school dropouts than their non-Hispanic counterparts.

¹The United States refers to the 50 states and the District of Columbia.

NOTE: The status dropout rate reported in this indicator is one of a number of rates reporting on high school dropout and completion behavior in the United States. See supplemental note 2 for more information about the rate reported here. Due to small sample sizes for most or all of the years shown in the figure. American Indians/Alaska Natives and Asians/Pacific Islanders are included in the total but are not shown separately. The erratic nature of the Hispanic status dropout rates reflects, in part, the historically small sample size of Hispanics. Black includes African American and Hispanic includes Latino. Race categories exclude Hispanic origin unless specified. Some estimates are revised from previous publications.

¹Due to small sample sizes for most or all of the years shown in the table, American Indians/Alaska Natives and Asians/Pacific Islanders are included in the total but are not shown separately. Black includes African American and Hispanic includes Latino. Race categories exclude Hispanic origin unless specified.

SOURCE: Laird, J., Lew, S., and Chapman, C. (forthcoming). Dropout Rates in the United States: 2002 (NCES 2005—040), table 8. Data from U. S. Department of Commerce, Bureau of the Census, Current Population Survey (CPS), October Supplement, 1972—2002.

NOTE: The status dropout rate indicates the percentage of 16- through 24-year-olds who are not enrolled in high school and who lack a high school credential relative to all 16- through 24-year-olds. High school credential includes a high school diploma or equivalent credential such as a GED. Estimates beginning in 1987 reflect new editing procedures for cases with missing data on school enrollment items. Estimates beginning in 1992 reflect new wording of the educational attainment item. Estimates beginning in 1994 reflect changes due to newly instituted computer-assisted interviewing. See *supplemental note 2* for more information. Some estimates are revised from previous publications.

| West | 10.4 | 882 | 8,520 | 23.7 | 24.0 |

Due to small sample sizes, American Indians/Alaska Natives are included in the total but are not shown separately. Black includes African American and Hispanic includes Latino. Race categories exclude Hispanic origin unless specified.

SOURCE: Laird, J., Lew, S., and Chapman, C. (forthcoming). Dropout Rates in the United States: 2002 (NCES 2005—040), table 6. Data from U. S. Department of Commerce, Bureau of the Census, Current Population Survey (CPS), October Supplement, 2002.

² Individuals defined as "first generation" were born in the 50 states or the District of Columbia, and one or both of their parents were born outside the 50 states or the District of Columbia.

³Individuals defined as "second generation or more" were born in the 50 states or the District of Columbia, as were both of their parents.

NOTE: The status dropout rate indicates the percentage of 16- through 24-year-olds who are not enrolled in high school and who lack a high school credential relative to all 16- through 24-year-olds. High school credential includes a high school diploma or equivalent credential such as a GED. Detail may not sum to totals because of rounding. See *supplemental note 1* for more information on region. See *supplemental note 2* for more information about the Current Population Survey.
